

No pre-sanding required. Paint directly on rust!

Next generation anti-rust paint

Looking directly at the troubled site ...

**Physically impossible place
to be prepared and in order to avoid
environmental pollution.**

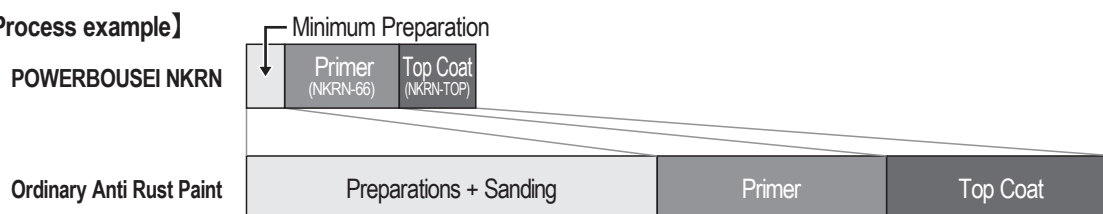

Ordinary rust preventive paint contains lead, chromium and others that are harmful heavy metals. They cause environmental pollution when they peeled from substrate.

Reduce application time and cost significantly!

No preparation is the noteworthy feature of this product. Reduction of construction cost and period

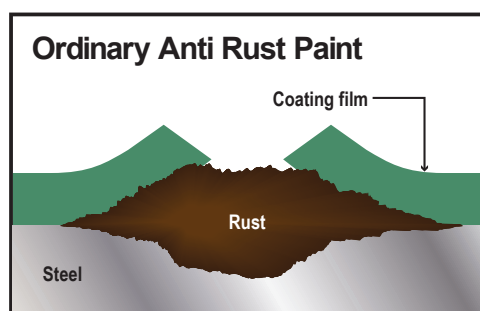

[Process example]

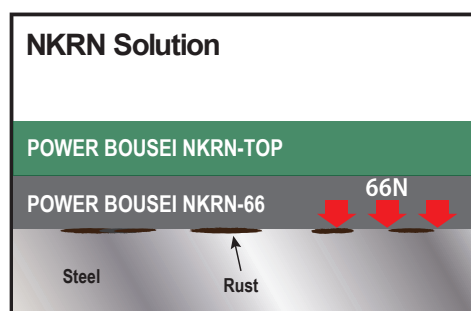

A great difference in long-lasting durability by rust prevention and reinforcement

NKRN-66 - An incredible anti-rust primer!

**NKRN - TOP - Incredible weather proof,
a flexible layer prevents cracking!**

Coating film is broken by rust. Rust begins to spread gradually.

[POWER BOUSEI NKRN-66] strongly presses rust with 66N pressure. In addition, strong and highly flexible [POWER BOUSEI NKRN-TOP] prevents rust for a long time.
